

Music Grams

Subject: Music, Math,
Economics

Grade Level: 6-8

Concept: Economic
Concepts

Method: Students as
Leaders

OVERVIEW

Students will create their own songs, using music theory concepts learned in class. Students will practice their compositions until memorized. They will sell "Music Grams" to the student body during school hours, preferably during February. Purchasers of the "Music Grams" will write down the name of a student for whom the "Music Gram" will be performed. (On a specified day, at a specified time, per the administration). Students will determine the price of the "Music Gram" and to whom the funds will be donated.

Connection to Entrepreneurship: Students will create music grams to sell around Valentines Day. Students will advertise their product using various platforms to reach the student body.
